

QlikView® November 2017 SR7 Release notes

What's new in QlikView November 2017 SR7

QlikView November 2017 SR7 includes only bug fixes.

What's new in QlikView November 2017 SR6

QlikView November 2017 SR6 includes only bug fixes.

What's new in QlikView November 2017 SR5

QlikView November 2017 SR5 includes the following updates:

Change in the setting for Cleaning trigger records in Trigger_guid.xml

The hidden setting `TriggerStatesKeepTimeInHours` has been added to the `QVDistributionService.exe.config` file located in `C:\Program Files\QlikView\Distribution Service`. It replaces the setting called `TriggerStatesKeepTime`. This setting allows you to decide after how many hours old entries in recorded in `Trigger_guid.xml` files are deleted. By default, `TriggerStatesKeepTimeInHours` deletes entries older than 24 hours. `Trigger_guid.xml` files record entries for each task execution, and are stored in: `C:\ProgramData\QlikTech\DistributionService\Triggers`. `TriggerStatesKeepTimeInHours` helps lowering the size of `Trigger_guid.xml` files, which can grow to MBs, especially when tasks are run frequently.

What's new in QlikView November 2017 SR4

QlikView November 2017 SR4 includes only bug fixes.

What's new in QlikView November 2017 SR3

QlikView November 2017 SR3 includes only bug fixes.

What's new in QlikView November 2017 SR2

QlikView November 2017 SR2 includes only bug fixes.

What's new in QlikView November 2017 SR1

QlikView November 2017 SR1 includes the following updates:

Change Notes sharing settings for AJAX clients

For AJAX clients, it is now possible to change the default value for who is allowed to see a note connected to an object.

To change the sharing settings, you must modify the following entry in the settings.ini file:

NoteSharingDefaultAccess=0 Only the creator can see the note.

NoteSharingDefaultAccess=1 The note visibility is set to public and anyone can see the object (Default setting).

NoteSharingDefaultAccess=2 Visibility is restricted to specific users.

New procedure for changing time-out setting for QlikView Server

From QlikView November 2017, the procedure for modifying time-out setting for QlikView Server has changed. To set a time-out period different from the default settings of 60 seconds, you must modify the QVWebServer.exe.config file by adding the setting SocketTimeOutInSeconds followed by the desired time-out period. The QVWebServer.exe.config file is located in C:\Program Files\QlikView\Server\Web Server.

The previous time-out setting QvsTimeout, located in C:\ProgramData\QlikTech\WebServer\Config.xml, is no longer applicable. If you had previously modified QvsTimeout to apply a custom time-out period, you must set the same value for SocketTimeOutInSeconds in the QVWebServer.exe.config file.

Known issues and limitations in QlikView November 2017 SR7

Column order in tables changed after upgrade to QlikView November 2017

Jira issue: QV-14945

Upgrading to QlikView November 2017 from an older version might cause the order of columns in straight table to change, with the columns being sorted in a different order.

Columns order change in straight tables with dimensions and expressions stored in variables

Jira issue: QV-15025

After upgrading to QlikView November 2017, the arrangement of dimensions and expressions stored in a straight table is modified, with dimensions being moved last column in table. This happens when the straight table is saved without values in variables.

QlikView document stops responding in WebView mode and Ajax client due to Script error

Jira issue: QV-15126

After upgrading to QlikView November 2017, some document containing listboxes stop working properly when turning the view from Desktop to WebView, or if accessing the document in the Ajax client.

Known issues and limitations in QlikView November 2017 SR5

Customers upgrading from 11.20 to 12.20

Please see this Support Article for issues to be aware of when upgrading

<https://qliksupport.force.com/articles/000047422> .

QV Scalability Tools not working after security improvement

The package QlikView Scalability Tools is currently not working in QlikView November 2017. This is a consequence of security improvement QV-12557, which you can find in the following list bug fixes included in QlikView November 2017 SR3.

A new, fixed version of the QlikView Scalability Tools package has been released in March 2018 and is downloadable from Qlik Community at the following link:

QV Scalability Tools (QV10, QV11, QV12): <https://community.qlik.com/docs/DOC-6658>

BUG FIXES INCLUDED IN QLIKVIEW NOVEMBER 2017 SR7:

Dimension Limits 'Show only values that accumulate to' gets inconsistent results

Jira issue: QV-10947

Fail to find triggers after upgrading to November 2017 SR3

Jira issue: QV-13837

Some triggers fail during night reload in QlikView 12.10

Jira issue: QV-14003

Message “This SqlTransaction has completed; it is no longer usable” presented after installing QlikView November 2017

Jira issue: QV-14079

Performance degrade when using Pareto function in QlikView November 2017

Jira issue: QV-14098

When several tasks are started, some fail because are shown as running although they are in queue

Jira issue: QV-14151

AbsoluteMaximumMinutesBeforeTaskTimeout not working after upgrade from QlikView 11.20 to November 2017

Jira issue: QV-14348

"Drawing of chart failed internally" message shown if one set Enable Conditional is set to 0 for a dimension

Jira issue: QV-14555

Japanese text is corrupted in QlikView when opening an htm file created in MS Word

Jira issue: QV-14615

QlikView Dashboard stops working when opening a sheet via Access Point

Jira issue: QV-14661

The dialog for Client Refresh Initiation Mode is available only one time per session

Jira issue: QV-14665

"Failed to connect to QlikView Connector" or "Failed to unbundle QVConnect" error messages shown in QlikView due to group policies.

Jira issue: QV-14723

Ajax client stops working in QlikView November 2017 SR5 when switching between sheets

Jira issue: QV-14745

"This engine is about to expire" message presented although license is valid

Jira issue: QV-14885

BUG FIXES INCLUDED IN QLIKVIEW NOVEMBER 2017 SR6:

Mail with Bookmark as a Link, not working with plugin QlikView November 2017 SR2

Jira issue: QV-13227

Calendar Object Drop down not showing years previous to 2017 (Ajax)

Jira issue: QV-13235

Changes in width or height of a List box or container object in properties, caption are not applied.

Jira issue: QV-13973

Publisher unable to save QVW files with large amounts of bookmarks

Jira issue: QV-14033

Custom Message of Calculation Condition not working in Table Box (Ajax)

Jira issue: QV-14034

OnDemand bookmarks not returned correctly from GetBookmark on QlikView November 2017 SR2

Jira issue: QV-14053

Associative selection behavior is inconsistent after upgrade from QlikView 11.20 to November 2017

Jira issue: QV-14178

Webticketing Fails in November 2017 SR5 When Using Windows Authentication With Users Belonging to a Group

Jira issue: QV-14575

BUG FIXES INCLUDED IN QLIKVIEW NOVEMBER 2017 SR5:

QlikView Desktop ignores the "ExtendedErrorLoggingMode" setting

Jira issue: QV-14028

QV Accesspoint: "No matches for current search" error displayed even when matching characters are found

Jira issue: QV-14025

Open URL actions get "?lang=eng-us" added to the url

Jira issue: QV-13938

Unbalanced QVS with AccessPoint Load Balancing resulting in no access

Jira issue: QV-13921

Information on groups and users not available in the QMC cache

Jira issue: QV-13786

Fixed Record statement fails to create correct header row in QlikView November 2017

Jira issue: QV-13773

QlikView Server sends wrong information to QV Web Server about Loaded Document

Jira issue: QV-13771

'Drawing of chart failed internally' error is displayed in Line chart on Webview/AJAX after upgrade from QV 11.20 to 12.20 IR/SR3

Jira issue: QV-13611

Personal Edition Warning and "Failed to open document" error when opening qvw file created with QV Desktop Personal Edition on a licensed version of QV November 2017

Jira issue: QV-13601

Reducing a document and distributing it fails with error "Failed to reduce and save document"

Jira issue: QV-13560

QlikView November 2017 SR2 release does not display X and Y coordinates on scatter plot

Jira issue: QV-13558

IF clause with LOAD ... AUTOGENERATE statement ignores script after END IF in QV November 2017

Jira issue: QV-13020

Legend cannot be changed from vertical to horizontal in Pie chart and Funnel chart

Jira issue: QV-12995

Colour bands in Area chart are not applied when dataset contains negative values. QV November 2017

Jira issue: QV-12987

Resizing bar chart with offset causes the bars to shift position

Jira issue: QV-12808

Custom cell format in straight table not reproduced in after upgrade to QV November 2017 (Ajax)

Jira issue: QV-12753

QlikView Desktop stops working when clicking Table properties, Sort tab

Jira issue: QV-12619

Changing and sorting dimension causes QlikView desktop to crash

Jira issue: QV-12227

BUG FIXES INCLUDED IN QLIKVIEW NOVEMBER 2017 SR4:

Changes in Settings.ini are not propagated to the other QVS nodes in November 2017

Jira issue: QV-13694

Box tab in container object not properly displayed in QlikView November 2017 SR3

Jira issue: QV-13685

Dimension label misplaced when upgrading from QV 11.20 to November 2017 (Ajax)

Jira issue ID: QV-13477

Difference between Chrome and IE in sizing an object in QV November 2017 SR2 (Ajax)

Jira issue ID: QV-13475

Missing InterfaceLanguage in settings.ini breaks (Ajax) after upgrade to November 2017

Jira issue ID: QV-13427

Box plot expression using variables fails to work after upgrade from 11.20 to November 2017

Jira issue ID: QV-13268

Mail with Bookmark as a Link not working November 2017 SR2 Access point with latest IE Plugin

Jira issue ID: QV-13227

Performance decrease when opening a file in Access point for the first time with November 2017 SR1

Jira issue ID: QV-13204

MAILTO function not working after upgrade from 11.20 to November 2017 SR2

Jira issue ID: QV-13193

QlikView Desktop November 2017 SR2 stops working when applying a custom Color map to an object

Jira issue ID: QV-13120

Adding a dimension to an expanded Pivot Table causing sudden total RAM consumption. QlikView 12.10 and November 2017 Ajax client

Jira issue ID: QV-13072

Script Editor in QV November 2017 fails to recognise multiple named ranges from same row of XLSX file

Jira issue ID: QV-13033

Help text pop-up in objects doesn't show the content when hovering over help sign in Access point November 2017

Jira issue ID: QV-12820

Custom Message of Calculation Condition not working in Ajax client for November 2017

Jira issue ID: QV-12761

Performance Reduction when upgrading from QV 11.20 SR10 to QV 12.10 SR8

Jira issue ID: QV-12503

Error bars are not displayed in stacked bar charts if the expression is invisible. Upgrade from QV 11.20 to QV 12.10

Jira issue ID: QV-12502

In Pivot tables, undo selections by clicking a cell twice fails after upgrade from QV 11.20 to QV 12.10 SR8

Jira issue ID: QV-12277

Confirm dialog window for Note deletion hidden behind Note dialog window (Ajax)

QV-12138

Message "An earlier version of QlikView November 2017 has been detected" showed in Install wizard even when no previous November 2017 is installed

QV-12137

Right click on a cycle group causes "Lost connection to Server" + Menu is not available in QV 12.10 SR6

Jira issue ID: QV-11709

Curly braces stripped from values in a connection string when passed to a connector

Jira issue ID: QLIK-81788

BUG FIXES INCLUDED IN QLIKVIEW NOVEMBER 2017 SR3:

QlikView November 2017 SR3 includes fixes for the following issues entered in Jira:

Engine Crashing with Internal Inconsistency CPV

Jira issue ID: QLIK-76888

Exported table with null values is presenting "-" instead of blank

Jira issue ID: QV-13046

QMC's Task Overview showing full path instead of Document Name

Jira issue ID: QV-13019

Documents using too much memory are not terminated in QlikView 12

Jira issue ID: QV-13017

'Send to Excel' is generating blank report if length of the object ID is greater than 22

Jira issue ID: QV-13015

QlikView JS Extensions not working in November release

Jira issue ID: QV-13003

Japanese characters in file name not reproduced when exported in xlsx

Jira issue ID: QV-12999

Reload task fails if "Script Parameters" have multiple values

Jira issue ID: QV-12855

Selected fields in Pivot table retain green selection after field is cleared in Ajax and Webclient

Jira issue ID: QV-12844

Ajax page displayed with enlarged font in Safari on Ipad

Jira issue ID: QV-12831

Document chaining not working in IE Plugin

Jira issue ID: QV-12737

qvw document with Direct Discovery fails to be opened on Access Point

Jira issue ID: QV-12569

Cross-Site Request Forgery missing in Access point

Jira issue ID: QV-12557

Macro compromise QlikView functionality after upgrade from 11.20 SR17 to 12.10 SR6

Jira issue ID: QV-12422

Reduction and distribution of a document fails with error "Failed to generate QVW files"

Jira issue ID: QV-12344

Blank column exported to excel when table has hidden columns

Jira issue ID: QV-11985

stripComments System Variable fails to send the comment to a database in QV 12.10

Jira issue ID: QV-11648

Radar chart inside a container causes QlikView to stop functioning

Jira issue ID: QV-10954

List Box in container not properly rendered when changing the selection

Jira issue ID: QV-7906

Tables with containers disappear once triggered

Jira issue ID: QV-7474

QlikView freezes when maximising/minimising the container object

Jira issue ID: QV-4654

BUG FIXES INCLUDED IN QLIKVIEW NOVEMBER 2017 SR2:

QlikView November 2017 SR2 includes fixes for the following issues entered in Jira:

Multiple search results are presented differently in QV 12.00 or higher compared to 11.20

Jira issue ID: QV-12383

Time format changed to serial number when selecting "Send to Excel"

Jira issue ID: QV-13002

Date format is exported to Excel as Numeric

Jira issue ID: QV-12733

Subsequent date range selections in list Box not applied in bookmarks

Jira issue ID: QV-11665

Area Chart Showing wrong data for mixed trend in QlikView

Jira issue ID: QV-11185

Bookmarks do not apply after being initially selected

Jira issue ID: QV-10927

“Read Only” in Chart Properties not working

Jira issue ID: QV-12832

QVB process summary not working in non-English Windows Server installations

Jira issue ID: QV-12642

Text overlapping in Bar Charts and Line Charts

Jira issue ID: QV-12148

BUG FIXES INCLUDED IN QLIKVIEW NOVEMBER 2017 SR1:

Conditional show of container not functioning properly in AJAX

Jira issue ID: QV-11696

Changing interface language server side has no effect in AJAX

Jira issue ID: QV-12548

Reload time increase after upgrade to November 2017

Jira issue ID: QV-12572

Degrade: Send To Excel, exports Dual Field As Number instead of Text

Jira issue ID: QV-12659

ListBox in AJAX not showing full list of possible selections

Jira issue ID: QV-11986

QMC status page isn't correct when using Distribution groups

Jira issue ID: QV-11901

Values on Data Points different exhibited in 12.10 than in 11.20 when using sum of two fields

Jira issue ID: QV-11064

"Override locked field" is not working in calendar object

Jira issue ID: QV-9163

Page blinking while doing selections using iframe+IE11

Jira issue ID: QV-10634

Combo chart showing different behavior in 11.20 SR13 compared to 11.20 SR16/12.10.X

Jira issue ID: QV-12009

When exporting objects to Excel the formatting from QlikView is not preserved

Jira issue ID: QV-12560

Microsoft Edge - AJAX: Listbox values are missing

Jira issue ID: QV-11697

Unable to binary load Section Access document in QlikView 12.20 server

Jira issue ID: QV-12573

Scrolling Behavior Differs QlikView 12.10 SR7 AJAX vs. 11.20 SR4

Jira issue ID: QV-12076

Chart Overlay Change Behaves Differently in QlikView 12.10 SR7 AJAX vs. 11.20 SR4

Jira issue ID: QV-12005

Search Object issue when selecting chars using mouse and then delete or retype

Jira issue ID: QV-9434
